Muhammad Hassan Naeem

Profile

Problem-solver Software Engineer and creative thinker that thinks not only about how precise is the quality of the code, but also about how the user experience can be shaped and finding ways to do that. Customer obsessed, pixel-perfect, and deadline-oriented, results in projects with long-term value.

Delighted about the constantly evolving world of front-end web who finds ways to express complicated ideas through intuitive design. Trying always to come up with new and simplified ideas, which usually results in more with less.

My passions for efficiency are reflected in my daily life and I love working with multidisciplinary and smart teams. I shine in a quick-turnaround environment, writing quick loading, efficient code, and thrilled by the challenge of pushing the limits of front-end development, delivering disruptive, and innovative solutions to the world that will fascinate my customers.

Besides being a software engineer, I am also the ultimate power web user, who is always up-to-date with the latest trends and discoveries in web development technology and working experience ranging from small websites to multi-million-dollar applications.

Experience

Software Engineer (React Js || React Native) • **1st DraftCoder Squad**
(Sep-2020) – (Nov-2021)

Responsibilities:

- Writing application interface codes using JavaScript following react.js workflows.
- Developing and implementing highly responsive user interface components using react concepts.
- Developing and implementing front-end architecture to support user interface concepts.
- Optimizing components for maximum performance across a vast array of web-capable devices and browsers
- Making Mobile Apps compatible on both IOS and ANDROID

Personal Information

Nationality: Pakistani

Marital Status: Unmarried
